DETAILED ACTION

Examiner's Amendment

- 1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 2. Authorization for this examiner's amendment was given in a telephone interview with Daniel R. McClure on December 3, 2004.
- 3. The application's specification and claim has been amended as follows:

Page 6, line 13, "308" has amended as -410 --.

Page 6, line 27, "322" has amended as – 416 --.

Page 7, line 8, "104" has been amended as -414 --.

Claim 1, line 5, "having" has been amended as -has--.

Claims 7 and 22, line 2, "photosensitive resin" has been amended as –photosensitive organic resin --.

Reason For Allowance

- 4. Claims 1-27 are allowed.
- 5. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 16, which include (claim 1) two supporters respectively

Page 3

disposed on the black matrix layers wherein each of the supporters having a width smaller than the width of each of the black matrix layers; a first electrode formed between the supporters and on the black matrix layers; (claim 16) steps for forming micro mechanical system display cell comprising of forming two black matrix layers and a planarization layer wherein the black matrix layers and the planarization layer are arranged alternately; forming a first electrode on the black matrix layers and the planarization layer; forming a sacrificial layer on the first electrode; forming at least two openings in the first electrode and the sacrificial layer; forming a supporter in each of the openings; forming a second electrode is on the sacrificial layer and the supporters; and removing the sacrificial layer.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chuang et al. (US Patent 6,448,709 B1) discloses a field emission display panel having diode structure and method for fabricating in Figure 3 comprising of a transparent substrate (44), a black matrix layer (72), two supporters (82), a first and second electrode (46 and 48); however, Chuang et al. does not teach or suggest wherein two black matrix layers, the first electrode formed between the supporters and on the black matrix layers.
